Bookshop Analysis Project

<u>Prepared By:</u> Gautami Jagannath Katti

<u>Stakeholder:</u> Bookshop Owner

Entity Name	Entity Type	Explanation
Checkout and Sales Count Analysis	Worksheet	Analyzing Checkout and Sales Count data provides stakeholders with valuable insights into the performance of authors and their books. This dual perspective in the form of pie chart, considering both sales figures and the popularity of books as indicated by the sum of checkouts, offers a comprehensive overview of an author's impact in the market based on the genre selected by the stakeholder.
Book Ratings & Reviews	Worksheet	Book Ratings and Reviews offer stakeholders valuable insights into the performance of book titles within a selected genre. By analyzing reader ratings and qualitative feedback, stakeholders can understand the reception of specific titles, aiding decisions on inventory management and marketing strategies.
Author's Monthly Sales	Worksheet	The Author's Monthly Sales line chart visually highlights sales trends for different authors over months, with each author represented by a distinct line. This approach allows stakeholders to quickly identify patterns and understand how various genres influence overall sales dynamics. It provides valuable insights for strategic decision-making in marketing, inventory management, and business planning.
Top 10 Rated Authors	Worksheet	The Top 10 Rated Authors radial chart offers a visually engaging and holistic view of the highest-rated authors based on their respective counts of books. Each author is represented radially, creating an intuitive snapshot of their standing within the top 10.
Authors' Daily Writing Hours WordCloud	Worksheet	Daily Writing Hours for Authors WordCloud is a visually compelling depiction of authors' everyday writing patterns. The WordCloud's varied sizes and prominence of each author's name eloquently express the intensity and frequency of their daily writing hours. This gives stakeholders insightful information on individual work ethics in addition to providing an original and captivating summary of the writers' dedication.
Awards Received by the Author	Worksheet	The "Awards Received by the Author" visualization, displayed as a Highlight table, succinctly outlines the recognition and accolades each author has earned. The table efficiently captures the count of awards for each author, offering a quick and accessible reference for stakeholders

		to assess and compare authors' achievements within the literary realm.
Pareto Chart: Analysis of Publishing House Book Sales	Worksheet	The Pareto Chart, designed to prioritize efforts, visually highlights books that significantly contribute to sales revenue across different Publishing Houses. By showcasing the distribution of sales across various titles, it helps stakeholders identify the critical few books that have the most substantial impact on overall sales. This prioritization enables strategic decision-making, allowing Publishing Houses to focus resources, marketing efforts, and promotional strategies on the key titles that play a pivotal role in driving revenue and overall success.
Annual Spend and Sales by Publishing House	Worksheet	This is a dual-axis chart featuring a line chart indicating the count of sales and a bar chart showcasing marketing spend for each publishing house. This visual representation offers a quick yet comprehensive overview of the financial dynamics, enabling stakeholders to assess the correlation between marketing expenditure and sales performance. The line chart highlights sales trends, while the bar chart visually compares marketing spend, facilitating informed decision-making on budget allocation and strategic planning for each publishing house.
Weekly Forecast of the Publishing House based on the Sales	Worksheet	The Weekly Forecast of the Publishing House, represented by a Sales line chart, dynamically illustrates the trend of both actual and forecasted sum of Sale Revenue across different Sale Date Weeks, broken down by Publishing House. This visual incorporates minimum and maximum revenue markers, providing stakeholders with a clear view of revenue variations within the selected Publishing House.
Genre Insights Dashboard	Dashboard	The filtered dashboard provides a concise overview for the Bookshop Owner. It reveals the popularity of genres through Checkout and Sales Count, tracks individual author performance with Author's Monthly Sales, and gauges customer sentiment via Book Ratings and Review Counts. This consolidated information empowers quick and strategic decision-making to enhance inventory management, marketing, and overall customer satisfaction.
Author Performance Insights Dashboard	Dashboard	The radial chart highlights the Top 10 rated Authors, aiding in personalized recommendations. The Author's daily writing hours, presented in a word cloud, offer a unique perspective on authors' dedication. The awards section guides inventory choices, focusing on recognized literature. This concise overview equips the Bookshop Owner to tailor strategies for customer satisfaction and successful book curation.

Publishing House Insights Dashboard	Dashboard	The Weekly Forecast offers real-time insights into the publishing house's upcoming sales, aiding in proactive inventory management. The Pareto Chart succinctly analyzes the publishing house's performance, highlighting the vital few factors contributing to sales and spending. This amalgamation of forecast data and Pareto analysis equips the Bookshop Owner with actionable insights for strategic decision-making, ensuring optimal resource allocation and sustained profitability throughout the year.
Bookshop Owner Insights	Storyboard	The Bookshop owner's journey is told through three dashboards in a story of data-driven decision-making. The first, a panoramic perspective, reveals genre popularity, author performance, and consumer feedback. The second is a literary excellence gallery that features top-rated writers, daily writing devotion, and award recognition. The third dashboard, the climax, displays a weekly forecast for real-time sales data and a Pareto chart for quick performance reviews. These dashboards work together to create a story that guides strategic choices, improves customer happiness, and ensures long-term profitability.
